ACCESS TO INSURANCE MARKETS

Ag Guard through its agricultural expertise brings access to a large number of rural insurers and underwriting agencies. Ag Guard can facilitate crop, farm, domestic, business and commercial insurance solutions.

WORKING WITH FREE EYRE

The FREE Eyre strategic partnership with Ag Guard is simple, personal and transparent. The FREE Eyre team will introduce and refer growers to the Ag Guard team. Ag Guard will then search for the most appropriate and cost effective insurance cover in the market place and prepare a formal proposal to the farmer, personally explaining the terms and conditions of the insurance cover that has been recommended.

WHAT HAPPENS WHEN I HAVE AN INSURANCE CLAIM?

In the event of a claim event, Ag Guard will assist our growers to complete a claim notification form which will then be forwarded to the insurance company. The insurer will then appoint a local assessor who will contact the client accordingly.

Each insurance company has a slightly different claims process, but the majority of insurers utilise the same panel of local assessors and Ag Guard would help to coordinate this assessment process.
